

## ⚙️ ADSN - LEAD SOFTWARE ENGINEER

09/2023 - 10/2025

Technical leadership and full-stack development on applications within ADSN's Central File portfolio.

### Key Responsibilities

- Technical lead (with two developers under my supervision) on the complete redesign of ADSN's new client portal, built as a multi-frontend architecture using Module Federation, while ensuring architectural consistency with modules developed by other portfolios.
- Co-technical lead (with eight developers under our supervision) on cross-portfolio initiatives, including final developments for the notariat-wide system handling apostilles and legalizations.
- Continued contribution to the evolution and maintenance of central APIs and business logic.

### Technologies acquired/deepened

Java   Spring Boot (*web, security, batch, data*)  
Keycloak (*OpenID Connect, OAuth2*)   OAS (*swagger*)  
Angular   Bootstrap   PrimeNG   Module Federation

### Tools used

- IntelliJ IDEA  
Comprehensive use
- Bitbucket / GitKraken  
Standard use + repository configuration
- Bamboo  
Standard use + pipeline configuration
- Jira  
Ticket creation, agile board/backlog management, version planning and delivery
- Figma  
Read-only use for accurate UI/UX implementation based on design mockups

### Languages used

French (*daily, native*)

## ADSN

05/2022 - 10/2025

ADSN is part of the Groupe ADSN, delivering nationwide digital infrastructure for the French notarial profession under delegated public service duties.

Its systems support regulated legal processes, including property transactions and official data exchanges.

📍 Venelles, France

## ⚙️ NATIXIS - SOFTWARE DEVELOPER

09/2013 - 09/2015

Work-study program contributing to the web components of DEFI, a retail securities custody platform used by Natixis Eurotitres division.

### Key Responsibilities

- Mapped Oracle database structures to Java business classes
- Developed administration interfaces and a custom order entry screen
- Contributed to front-end components using jQuery
- Built productivity tools to bridge distributed UIs and the central platform (*middleware-focused tools*)
- Designed marketing analytics tools (*traffic stats: total hits, daily hits, unique visitors, etc.*)

### Technologies acquired/deepened

Java

JSP (JSTL, intern. taglibs, cust. taglibs)

hibernate

HTML

CSS

### Tools used

- RSA (*Rational Software Architect*)  
Eclipse-based with Websphere support
- Eclipse for Web Developers  
Advanced use

## ⚙️ SCFI - WEB DEVELOPER AND INTEGRATOR

---

09/2012 - 09/2013

Work-study program focused on web development and integration for various projects (*corporate websites, internal management tools, e-commerce platforms*)

### Key Responsibilities

- Maintained and upgraded the intranet of a nonprofit home care association (intervention scheduling, time tracking, invoicing, payroll)
- Regular client interaction: monthly on-site meetings to gather feedback and adjust features accordingly
- Maintained and improved the company's internal CMS
- Provided maintenance and updates for an e-commerce website

### Technologies acquired/deepened

ASP   PHP   HTML   jQueryUI   CSS  
Javascript   jQuery   Ajax

### Tools used

- Dreamweaver  
Basic use
- Photoshop  
Basic use
- IIS  
Basic use
- Linux  
Advanced use
